

Direct Connectivity

A full suite of direct connections to real-time capital markets, fixed income and money market information to suit your business requirements

Receive the highly tailored products direct from Tullett Prebon Information through a series of market leading, business efficient means of connection:

- SwapMarker®
- SwapMarker® Plus™
- TreasuryMarker®
- MortgageMarker®
- MoneyMarker®

SURF Datafeed

SURF is a TCP/IP based feed that can be delivered via:

- Leased line
- Internet
- BT Radianz

SURF is based on a Reuters Marketfeed protocol aimed at delivering our data in a simple and efficient format. Existing Marketfeed handlers will be able to read SURF with minimal alteration.

A low cost, fully robust and maintained Tullett Prebon Information feed handler is also available to deliver the data directly to your RMDS system. Alternatively, our customers have found they can rapidly develop their own feed handler using the SURF technical documentation

Tullett Prebon WebTools

Are you a web vendor requiring the highest quality real-time market data from the inter-dealer markets to enhance your product offering?

Are you a financial institution wishing to distribute our market leading products via your intranet browser display solutions or re-distribute Tullett Prebon Information's content to your customers?

Whatever your web-based market data requirements, Tullett Prebon Information can assist you in rapidly integrating both our page and record data via the internet using our WebTools.

Quick and efficient integration of Tullett Prebon Information's pages and records via the Internet within your web or intranet offering.

Asian FX Emerging Markets Feed

The screenshot displays a complex data table with multiple columns and rows, organized into sections. The top section is titled 'Emerging Markets' and includes a sub-section for 'USD'. Below this, there are several tables of data, each with columns for various market metrics and values. The data is presented in a structured, grid-like format with alternating row colors for readability.

The Tullett Prebon PageViewer with Excel Add-in

The Tullett Prebon PageViewer allows you to view single or multiple pages in an easy-to-use thin application.

It also has a unique drag-and-drop extension, which enables you to distil the underlying logical records from the page and drop them into Excel.

The Excel add-in appears as a menu item on the menu bar within Excel and provides enhanced functionality. From the menu you can display page records, chains and tables within your spreadsheets.

Our product pages on your desktop and our logical records within Excel, all via the Internet.

- Step 1** Contact Tullett Prebon Information.
- Step 2** Download and install our PageViewer with Excel add-in.
- Step 3** You now have dynamically updating pages and records on your desktop and within Excel via the Internet

Web Browser Access

Our products in page form within your browser or in floating pop-up windows on your desktop delivered via internet.

- Step 1** Contact Tullett Prebon Information.
- Step 2** From our home page, type in your username and password.
- Step 3** You now have dynamically updating pages within your browser with the ability to launch floating pop-up windows.

Our Web Browser access provides two modes of operation:

- A straightforward menu navigation approach within the browser allowing you to quickly navigate through the relevant product pages. Enhanced floating windows allow the keen market data professional to maximize the effectiveness of their screen real-estate.
- Our technology is based on unsigned Java applets, which automatically download but do not persist on your machine.
