

Enterprise Solutions

High quality, independent OTC information, market leading commercial terms and highly customisable and low cost data delivery options all tailored to your organisation's specific needs

- Rates
- Energy
- Volatility
- Equities
- Treasury
- Environmental
- Credit

Global OTC Coverage

Tullett Prebon Information's direct Enterprise Solutions provide the power of global interest rate swaps, foreign exchange, fixed income and OTC products in an easy-to-consume format, allowing integration into internal applications or distribution to external clients.

Data can be accessed in a page or record-based format using our acclaimed SURF (Single Unified Record Feed).

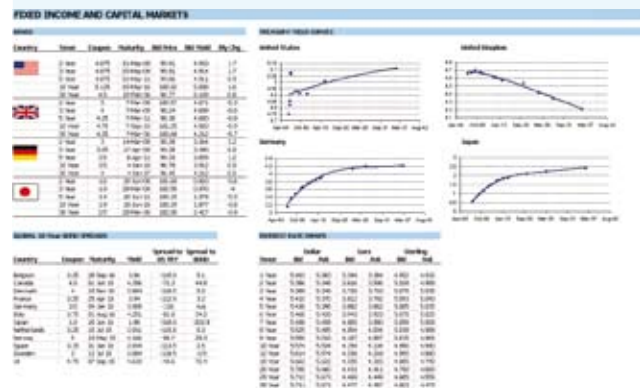

Flexibility

Products can be developed to suit the specific needs of your organisation with data being supplied on an asset class basis or on a regional basis. Tullett Prebon Information's market leading commercial terms enable tailored usage models including the distribution of information to end user terminals, user applications, or in the creation of derived data products either within the enterprise or to external customers.

Data can be provided as a real-time feed, on a snapshot basis as both intra-day and end-of-day or as a historical file.

Alternatively, pre-built page based data can be quickly integrated into display applications.

Expertise

To ensure you utilise the data fully, Tullett Prebon Information's experienced management and support teams are always available to help design and build your products.

Our knowledge and experience of the global financial markets, coupled with a significant understanding of the investment process, provide us with an exceptional insight into user requirements.

This powerful mix of content and market knowledge ensures that the product development process is quick, efficient and more importantly, effective.

Knowledge

Tullett Prebon Information's data can be used to support an organisation's business needs at every stage of the investment process. Although we are established leaders in the front office trading environment, our data is increasingly being used in such application areas as:

- Pre-trade analytics
- Risk management
- Mark-to-market
- Algorithmic pricing engines
